

## **FIRMWARE 1.3.0 FOR HASSELBLAD CFV II 50C DIGITAL BACK**

The 1.3.0 firmware is a feature and stability release for the CFV II 50C digital back. We recommend all users to update.

### **NEW FEATURES AND IMPROVEMENTS COMPARED TO V 1.2.0:**

- **Set ISO and white balance from camera live view screen**  
Quickly set ISO and white balance directly from the camera live view screen. See CFV II 50C User Guide for details.
- **Faster battery charging**  
Charging time with the 3400 mAh battery has been reduced by 20% when using the supplied charger.

#### **Note!**

Firmware 1.3.0 is the first version for the CFV II 50C (not the Special Edition) and earlier firmware versions cannot be used.

### **BUG FIXES**

- A bug that caused problems when connecting to Phocus Mobile 2 over Wi-Fi has been solved.
- General stability has been improved.

Installation instructions on the next page.

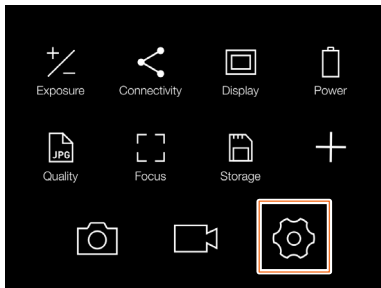

## UPDATE PROCEDURE

Make sure that you use a fully charged battery for the update. A charge level of 50% or more is required. Please note that the update procedure normally takes about 7-10 minutes, but can in some cases take up to 12 minutes.

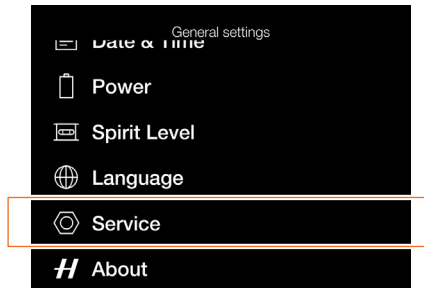

## IMPORTANT NOTES

- Wait until the message "Update is Completed" is shown.

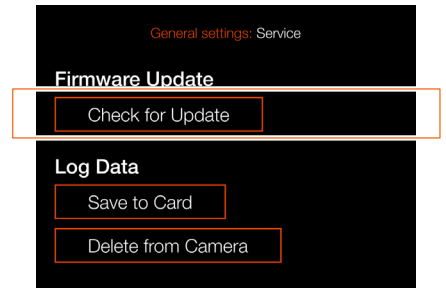

Copy the downloaded file (CFV\_II\_50C\_v1\_3\_0.cim) directly to the SD card (not into a folder) and insert it into the camera. Then follow the procedure below:

1: Select the "General Settings Menu" from the main menu.

2: Select "Service".

3: Click "Check for Update" and select the file "CFV\_II\_50C\_v1\_3\_0.cim" from the list. Finally, click "Update".
