FIRMWARE 1.24.0 FOR HASSELBLAD X1D-50C

The 1.24.0 firmware is a feature and bug fix release for the X1D-50c camera. We strongly recommend all users to update.

NEW FEATURES COMPARED TO V 1.22.0:

- Focus bracketing for all XCD lenses (except the XCD 45P)
  Note! The Focus Bracketing function requires a firmware update for the lens. Use version 0.5.33 or later for XCD lenses.
- Image rating. Activate in Camera Settings > Configuration.
- Support for XCD 45P
- Added 2/3 step for exposure bracketing

BUG FIXES COMPARED TO V 1.22.0:

- Profoto flash compatibility problem solved
- Remote release cable and B-mode + sound was not working
- Fixed occasional AF issue when close to near/infinity limit

UPDATE PROCEDURE

Make sure that you use a fully charged battery for the update. A charge level of 50% or more is required. Please note that the update procedure normally takes about 7-10 minutes, but can in some cases take up to 12 minutes.
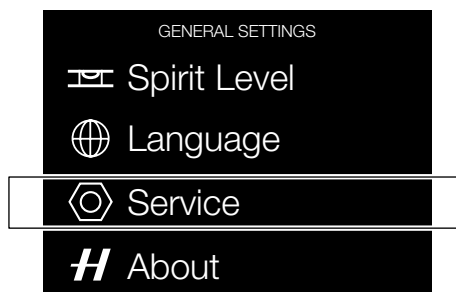

IMPORTANT NOTES

- It is not allowed to have the USB cable inserted during the update process.
- Wait until the message "Update is Completed" is shown. Then remove and reinsert the battery.

Copy the downloaded file (X1D_50C_v1_24_0.cim) directly to the SD card (not into a folder) and insert it into the camera. Then follow the procedure below:

1: Select the "General Settings Menu" from the main menu.

2: Select "Service".

3: Click "Check for Update" and select the file "X1D_50C_ v1_24_0.cim" from the list. Finally, click "Update".
