

FIRMWARE 4.2.0 FOR HASSELBLAD X2D 100C (2025.11.11)

Visit the Downloads section on the official website to download the latest firmware file:

<https://www.hasselblad.com/my-hasselblad/downloads>

WHAT'S NEW

- Optimised user experience when using the XCD 2,8-4/35-100E lens.
- Fixed issue where the white circles of the spirit level continued to drift after calibration.

NOTES

- “Update is completed” will be shown on the touch display once the update is successful.

FIRMWARE 4.1.1 FOR HASSELBLAD X2D 100C (2025.05.08)

Visit the Downloads section on the official website to download the latest firmware file:

<https://www.hasselblad.com/my-hasselblad/downloads>

WHAT'S NEW

- Fixed stability related issues.

NOTES

- “Update is completed” will be shown on the touch display once the update is successful.

FIRMWARE 4.0.0 FOR HASSELBLAD X2D 100C (2024.11.07)

Visit the Downloads section on the official website to download the latest firmware file:

<https://www.hasselblad.com/my-hasselblad/downloads>

WHAT'S NEW

- Added support for the Hasselblad XCD 75P Lens and X Extension Tube (9mm).
- Supported 4-shot Multi-Shot mode to capture 100MP true full colour images when using Phocus for Mac (version 3.8.3 or later) for tethered shooting.

Usage: In Phocus, set the type to Multi in Camera settings and then start shooting.

Capture notice: Keep the camera still during capture. Movements of the camera or the presence of moving people or objects in the frame may cause blurring in the merged image or even cause the image merge to fail.

NOTES

- "Update is completed" will be shown on the touch display once the update is successful.
