RELEASE NOTES

Firmware 1.21.0 for Hasselblad H6D

The 1.21.0 firmware is a feature release for all H6D cameras that adds new functionality.

New features and Improvements compared to v1.20.1 (1.20.2 for H6D-400c MS):

- **Audio Notifications.**
  Audible signals for different events.
- **White Balance Tool**
  Set White Balance by using an eyedropper tool to pick a neutral area from any captured image.
- **Profiles**
  Store and recall all camera settings in 7 different Profiles.
- **Tethered image import**
  Import images from the memory cards of a USB tethered camera.

- **Reset All Settings**
  New option to disable the reset of Profiles.
- **Shut-down message**
  A message will be shown on the display, when the camera is shutting down.
- **Browse Zoom**
  Long-press on the True Focus button zooms in to 100% or out to full image.
- **HDMI panning**
  When a HDMI monitor is connected, you can use the rear screen as touch-pad for panning in the zoomed-in image.

For more information about the new functionality, please download the latest User Manual for H6D version 1.8.
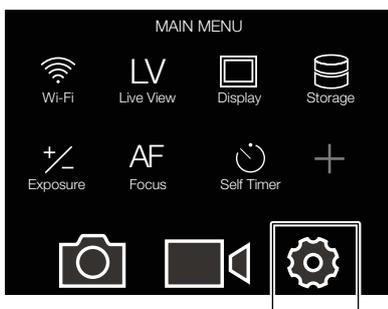

Update procedure

Make sure that you use a fully charged battery on the camera. A charge level of 50% or more is required. Please note that the update procedure normally takes about 7-10 minutes, but can in some cases take up to 12 minutes.
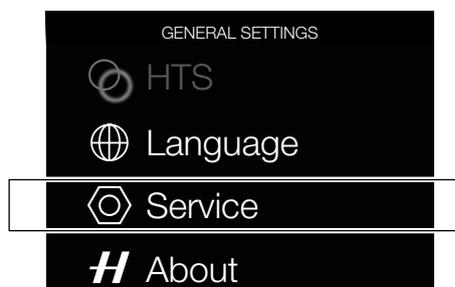

IMPORTANT NOTES:

- It is not allowed to have the USB cable inserted during the update process.
- Wait until the message "Update Finished" is shown. Then remove and reinsert the battery.
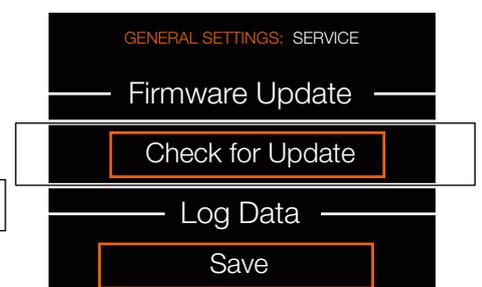

Copy the downloaded file (H6D_v1_21_0.cim) to the memory card and insert it into the camera. Then follow the procedure below:

1: Select the "General Settings Menu" from the main menu.

2: Select "Service"

3: Click "Check for Update" and select the file "H6D_v1_21_0.cim" from the list. Finally click "Update".
